PROFESSIONAL SUMMARY

Curious and self-driven MCA graduate with a strong interest in software development and AI-powered applications. Built and deployed full-stack projects while continuously exploring modern development tools and best practices. Passionate about solving real-world problems through technology. Seeking an opportunity to contribute to a collaborative engineering team, gain real-world development experience, and grow as a Software Developer.

PROJECTS

GoFi - AI-Powered Productivity Platform (live demo) 🔗

Python, Django, LangChain, ChromaDB, Gemini AI, Bootstrap, HTML, CSS, JavaScript, Docker

- Engineered RAG pipeline with Gemini API + LangChain + ChromaDB for semantic note search; enables context-aware retrieval across user notes independent of keyword matching.
- Implemented user-specific data isolation using Django authentication; enforced at database level to prevent cross-user data access.
- Optimized vector search with ChromaDB embeddings; achieves sub-second query response on 500+ sample notes.
- Deployed containerized app on TiDB Cloud for scalability and multi-user concurrency.

Mekanik - AI Vehicle Service Platform (live demo) 🔗

Python, Flask, MySQL, Gemini AI, Bootstrap, HTML, CSS, JavaScript, Docker

- Built multi-role marketplace (customer/mechanic/admin) with role-based access control; designed normalized schema using SQLAlchemy ORM relationships.
- Integrated Gemini API for vehicle issue categorization → auto-matches mechanics by specialization; reduces manual search friction by 80%.
- Implemented atomic slot management preventing overbooking; enforces real-time availability accuracy across concurrent appointment requests.
- Applied authorization checks on all CRUD operations; customers access only own data, mechanics access only assigned jobs via foreign key validation.

Impruv - Skill Evaluation System 🔗

Python, Flask, MySQL, HTML, CSS, JavaScript

- Built quiz evaluation engine with session-based state management and real-time answer validation using Flask-Login.
- Designed normalized schema tracking users, quizzes, questions, scores; modeled relationships with SQLAlchemy ORM.
- Implemented personalized learning recommendations based on performance analysis; identifies weak topics and suggests targeted practice.
- Enforced role-based access: admins manage quizzes, users take assessments and view performance dashboards.

SKILLS

Programming Languages: Python, JavaScript

Frontend: HTML, CSS, React

Backend: Flask, Django

Databases: SQL, MySQL, MongoDB

Tools & Version Control: Docker, Git, GitHub

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Time Management

EDUCATION

Master of Computer Applications

SREE NARAYANA GURUKULAM COLLEGE OF ENGINEERING
CGPA - 7.93

09/2024 – 06/2026 | Ernakulam

Bachelor of Computer Applications

SAS SNDP YOGAM COLLEGE

10/2021 – 06/2024 | Pathanamthitta

CERTIFICATES

- Data Science for Engineers - NPTEL (IIT Madras), 2025
- Responsive Web Design - freeCodeCamp
- SQL (Basic) Certificate - HackerRank
